

Olasılık ve İstatistik Ödevi:

Mustafa Kunt B201210052 Şube: 1-B

1. sorunun çözümü:

$$P(A) = \frac{4k}{12k} = \frac{1}{3} = \%33,3$$

$$b) P(B) = \frac{6k}{12k} = \frac{1}{2} = \%50$$

$$c) P(C) = \frac{4k}{12k} = \frac{1}{3} = \%33,3$$

$$d) B = \{x < 0\} \quad P(B|n) = \frac{B \cap n}{n} = \frac{1/12}{4/12} = \frac{1}{4} = \%25$$

$$e) C = \{0.25 < x\} \quad P(C|n) = \frac{C \cap n}{n} = \frac{5/12}{8/12} = \frac{5}{8} = \%62,5$$

$$f) P(A \cup B) = P(A) + P(B)$$

$$\frac{9k}{12} = \frac{1}{3} + \frac{1}{2}$$

$$\frac{3}{4} \neq \frac{5}{6} \quad \text{Bu yüzden aynı dağılımdır}$$

$$\text{Bağımsızlık şartı} = P(A \cup B) = P(A) + P(B) - P(A \cap B)$$

$$\frac{3}{4} = \frac{1}{3} + \frac{1}{2} - \frac{1}{12}$$

$$\frac{3}{4} = \frac{3}{4} \quad \text{dolu için bu dağılım bağımsızdır}$$
